an Interscience® Publication, published by **JOHN WILEY & SONS**

The *International Journal of Quantum Chemistry* (ISSN 0020-7608) is published semimonthly with two extra issues in November by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158.
Copyright © 1992 by John Wiley & Sons, Inc. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 or 108 of the United States Copyright Law without the permission of the copyright owner is unlawful.
Second-class postage paid at New York, New York, and at additional mailing offices.
The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article is $4.00 and is to be paid through the Copyright Clearance Center, Inc., 21 Congress St., Salem, MA 01970. This consent does not extend to the other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective work, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.
Subscription price (1992): $2,580.00 per year. Outside U.S.A.: $2,905.00 (air service and handling included). Back volumes, microfilm, and microfiche are available for previous years. Request price list from publisher. Allow four weeks to process a change of address. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

Claims for undelivered copies will only be accepted after the following issue has been received. Please enclose mailing label or cite your subscriber reference number in order to expedite handling. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

Postmaster: Send address changes to International Journal of Quantum Chemistry, Susan Malawski, Fulfillment Manager, Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158.

Advertising Sales: Inquiries concerning advertising should be forwarded to Roberta Frederick, Advertising Sales, John Wiley & Sons, Inc., 605 Third Ave., New York, NY 10158; (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO 19 1UD, England.

Manuscripts should be submitted in triplicate and accompanied by an executed Copyright Transfer Form to the Editorial Office, *International Journal of Quantum Chemistry,* Quantum Chemistry Group, University of Uppsala, Box 518, S-75120, Uppsala, Sweden. Authors may also submit manuscripts to the Editorial Office, *International Journal of Quantum Chemistry,* Quantum Theory Project, Williamson Hall, University of Florida, Gainesville, Florida, 32611. **Information for Contributors** appears in the first and last issue of each volume. **All other correspondence** should be addressed to the *International Journal of Quantum Chemistry,* Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158, U.S.A. The contents of this journal are indexed by the following: *Current Contents/Physical, Chemical and Earth Sciences; Science Citation Index; Chemical Abstracts; and Chemical Titles.*

INTERNATIONAL JOURNAL OF QUANTUM CHEMISTRY, VOL. 42, 1775–1779 (1992)

Subject Index to Volumes 41 and 42

Please note that A refers to Volume 41 and B refers to Volume 42.

Ab initio, 257A, 281A, 733A, 793A, 815A, 349B, 917B, 929B, 953B, 965B, 997B, 1009B, 1047B, 1091B, 1101B, 1141B, 1251B, 1271B, 1339B, 1353B
Ab initio calculations, 103B, 1595B
Ab initio configuration interaction (CI) calculations, 1563B
Ab initio CPHF calculations, 1577B
Ab initio criteria of completeness, 293A
Ab initio molecular orbital calculations, 591A
Ab initio MO method, 403B
Ab initio SCF molecular dynamics (MD), 1327B
Active-site protonation, 1537B
Adiabatic reaction path, 371A
Alcoholysis, 403B
Algebraic methods, 77A
Algebrants, 15A
All-electron basis functions, 509B
All-trans octatetraene, 257A
Alternant hydrocarbons, 613A
Alternant–molecular–orbital approximation, 517A
AM1 methods, 1633B
Anisotropic particles, 1171B
Antisymmetrically annulling (ASA) functions, 581A
Antisymmetrized geminal power (AGP) function, 339B
Artificial intelligence, 727B
Aspartic proteases, 1537B
Asymmetric double-well potential surface, 1659B
Atomic dipoles, 1237B
Atomic hydrogen, 1037B
Atomic oxygen chemisorption, 1149B
Atoms-in-a-molecule (AIM) electron populations, 243B
Autocorrelation, 365B
Automatic speech recognition, 741B
Average pair correction, 273B

Band structures, 1009B
Basis functions, 761B
Basis sets, 327A, 349B, 509B, 581B, 965B, 977B, 1185B, 1271B, 1577B
Bayman's gradient formula, 751B
Benzene rings, 869B
Berry's phase factor, 53A
Bethe logarithm, 287B
B functions, 399A
Bimetallic systems, 599A
Biomacromolecular function, 1427B
Biomacromolecular stability, 1427B
Biopolymers, 1449B
Bitrahedryl molecule, 953B
Bonding, 1115B
Boolean algebra, 719B
Born–Oppenheimer procedure, 53A
Born–Oppenheimer surfaces, 1327B
Bound-state systems, 849B
Breit interaction, 627B, 751B
Build-up procedure, 1529B

C_{60} molecules, 1651B
Carbenes, 1633B
Carbon cluster C_{60}, 1185B
Catalytic activity, 1047B
Cayley–Hamilton equations, 213A
C—H bond dissociation energy, 267B
Charge sensitivity analysis (CSA), 243B
Chemical reaction systems, 527A
Chemisorption, 1091B, 1101B, 1149B
Class-sums, 147A
Class theory, 719B
Clifford algebra unitary group approach (CAUGA), 117A
Closed-shell molecular systems, 627B
Cluster, 1149B
CNDO/INDO approximation I, 785A
CO adsorption, 599A
Cobalt spectroscopy, 1469BColumbus CI programs, 89A
Computer evolution, 547B
Computer sciences, 719B
Configuration analysis, 929B
Configuration interaction, 1717B
Conformational energy calculations, 1409B
Conformational preferences, 709A
Conformational structure, 1669B
Convergencies, 281A
